RECOMMENDATIONS

The following recommendations are prioritized by estimated impact on your AI Visibility Score.

HIGH PRIORITY

Claude doesn't mention you specifically

+5 points

AI AWARENESS

When asked about this business, Claude gave a generic answer. Build out structured data, get listed in directories that this model trusts, and publish authoritative content about the offering.

MEDIUM PRIORITY

Complete your Organization schema fields

+6 points

STRUCTURED DATA

Your Organization schema is missing key fields. AI models use `name` to identify you and `telephone`/`address` to answer 'how do I contact X'. Add the missing fields to unlock the full score.

Declare your social profiles in your Organization schema (sameAs)

+4 points

STRUCTURED DATA

Your site links to 4 social profiles (Instagram, Twitter / X, LinkedIn, GitHub), but your Organization schema has no sameAs array declaring them. sameAs is how AI models confirm those profiles and your website are the same entity — without it, signals from your social presence don't consolidate onto your business.

Your FAQPage schema has no questions

+5 points

STRUCTURED DATA

You have a FAQPage schema but `mainEntity` is empty. Add at least 3–5 Question/Answer pairs — AI chatbots pull these verbatim when answering customer questions.

Add dateModified to your Article or Blog schema

+4 points

CONTENT CLARITY

Content under 13 weeks old earns 3.2x more AI citations. dateModified in Article or BlogPosting JSON-LD is how AI crawlers read freshness without guessing from visible text. Without it, recently updated content appears stale to retrieval models.

AI-NATIVE

87% of ChatGPT's inline brand links come from Bing search results - ChatGPT uses Bing as its live retrieval layer, not Google. A business absent from Bing may earn AI mentions without ever earning AI links.

Create or claim your G2 profile

+3 points

AI-NATIVE

ChatGPT cross-references G2 alongside Wikipedia and Crunchbase to confirm entity identity before embedding an inline link. Consistent descriptions across these sources tell ChatGPT your brand is a confirmed entity worth linking.

Create or claim your Crunchbase profile

+3 points

AI-NATIVE

Crunchbase is one of three named entity-grounding sources ChatGPT checks before linking a brand. A missing or inconsistent Crunchbase description introduces entity ambiguity and reduces inline link probability.
