D

AI Visibility Grade

Scored 28 June 2026 | Report ID: 747f-9c51 | (Beta)

EXECUTIVE SUMMARY

32
/ 100 (BETA)
Grade D
Needs work

Econet achieved an AI Visibility Score of 32/100, earning a Grade D (Needs work) rating. This score reflects how prominently the business appears in responses from major AI platforms when customers search for products or services in this category.

2 of 3 AI providers mentioned Econet in their recommendations.

The score is calculated across two pillars: Controllable Signals (60%) covering structured data, website quality, content, and online presence; and AI Awareness (40%) covering whether AI models mention, recommend, and rank the business positively.

Report generated: 28 June 2026 | <https://econet.co.zw>

SCORE BREAKDOWN

The following table shows each scoring pillar, its contribution weight, the score achieved, and the key signals that drove that score.

PILLAR	SCORE	WEIGHT	DETAILS
Structured data	0/100	35%	No JSON-LD found on this page.
Crawlability	50/100	20%	AI crawlers allowed; no sitemap
Content clarity	0/100	20%	Title: no · Meta: no · H1s: 0 · Heading levels: 0
AI-native signals	25/100	25%	llms.txt: no · OG: no · Twitter: no · HTTPS: yes
AI awareness	55/100	40%	2/3 models mentioned you. Avg sentiment: -0.33.

AI PROVIDER ANALYSIS

The table below shows what each major AI platform said about Econet when asked to recommend businesses in this category.

PROVIDER	MENTIONED	SENTIMENT	POSITION	SUMMARY
ChatGPT	Yes	Negative	Not ranked	Econet Wireless Zimbabwe is the country's largest telecommunications provider, offering a range of services including mobile and fixed wireless telephony, internet access, and payment solutions. Their mobile network and internet services are widely used across Zimbabwe, and...
Claude	No	Neutral	Not ranked	# About Econet Econet is a major telecommunications company operating primarily in Zimbabwe, offering mobile phone services, data plans, and related connectivity solutions. Based on the .zw domain, they serve the Zimbabwean market and are one of the established telecom...
Gemini	Yes	Neutral	#1	Econet Wireless Zimbabwe is a prominent telecommunications provider in Zimbabwe, offering a wide array of services including mobile voice, data, internet, and digital financial services. They are recognized as the largest telecommunications operator in the country, with a...

RECOMMENDATIONS

The following recommendations are prioritized by estimated impact on your AI Visibility Score.

HIGH PRIORITY

Add JSON-LD structured data

+15 points

STRUCTURED DATA

Your site has no JSON-LD schema. Add an Organization or LocalBusiness schema with name, address, phone, hours, and URL. This is the single biggest factor for how AI models understand your business.

ORGANIZATION.HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "Organization",
  "name": "Econet",
  "url": "https://econet.co.zw",
  "logo": "https://econet.co.zw/logo.png",
  "description": "Econet",
  "telephone": "+1-555-555-5555",
  "address": {
    "@type": "PostalAddress",
    "streetAddress": "123 Main St",
    "addressLocality": "City",
    "addressRegion": "State",
    "postalCode": "12345",
    "addressCountry": "US"
  },
  "sameAs": [
    "https://twitter.com/yourhandle",
    "https://www.linkedin.com/company/yourbusiness"
  ]
}
</script>
```

Add a single, descriptive <h1> to your homepage

+5 points

CONTENT CLARITY

Your page has no <h1>. AI models lean heavily on the first heading to understand what a page is about.

Negative sentiment in ChatGPT's response

+4 points

AI AWARENESS

ChatGPT surfaced concerns about this business. Review the raw response, address the underlying issue (or correct misinformation by publishing clear, factual content on the site).

Claude doesn't mention you specifically

+5 points

AI AWARENESS

When asked about this business, Claude gave a generic answer. Build out structured data, get listed in directories that this model trusts, and publish authoritative content about the offering.

MEDIUM PRIORITY

Add an FAQ schema with common questions

+6 points

STRUCTURED DATA

FAQ schemas are heavily mined by AI chatbots. Pick the 5–10 questions customers actually ask and answer them on your site with FAQPage markup.

FAQ-SCHEMA.HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "FAQPage",
  "mainEntity": [
    {
      "@type": "Question",
      "name": "Do you offer a free trial?",
      "acceptedAnswer": {
        "@type": "Answer",
        "text": "Yes, we offer a 14-day free trial with no credit card required."
      }
    }
  ]
}
```

Publish a sitemap.xml

+5 points

CRAWLABILITY

A sitemap helps crawlers (including AI bots) find every important page. Generate one and link it from robots.txt.

Write a meta description

+4 points

CONTENT CLARITY

Add a 140–160 character meta description that clearly explains what your business does. AI models often quote it directly.

META-DESCRIPTION.HTML

```
<meta name="description" content="Acme Coffee Roasters: small-batch specialty coffee roasted weekly in Brooklyn. Free shipping on orders over $30.">
```

Publish an llms.txt file

+7 points

AI-NATIVE

llms.txt is an emerging standard (like robots.txt for AI). Add /llms.txt at your root listing your most important pages with brief descriptions. Respected by OpenAI (GPTBot), Anthropic (ClaudeBot), and Perplexity crawlers — not used by Google AI, but still increases your overall AI crawler reach.

LLMS.TXT

```
# Econet
```

```
> Econet
```
