D

AI Visibility Grade

Scored 12 July 2026 | Report ID: a35c-3f9c | (Beta)

EXECUTIVE SUMMARY

47
/ 100 (BETA)
Grade D
Needs work

villabethney achieved an AI Visibility Score of 47/100, earning a Grade D (Needs work) rating. This score reflects how prominently the business appears in responses from major AI platforms when customers search for products or services in this category.

1 of 3 AI providers mentioned villabethney in their recommendations.

The score is calculated across two pillars: Controllable Signals (60%) covering structured data, website quality, content, and online presence; and AI Awareness (40%) covering whether AI models mention, recommend, and rank the business positively.

Report generated: 12 July 2026 | <https://villabethney.com>

SCORE BREAKDOWN

The following table shows each scoring pillar, its contribution weight, the score achieved, and the key signals that drove that score.

PILLAR	SCORE	WEIGHT	DETAILS
Structured data	0/100	35%	No JSON-LD found on this page.
Crawlability	100/100	20%	AI crawlers allowed; sitemap present
Content clarity	71/100	20%	Title: yes · Meta: no · H1s: 1 · Heading levels: 4
AI-native signals	25/100	25%	llms.txt: no · OG: no · Twitter: no · HTTPS: yes
AI awareness	57/100	40%	1/3 models mentioned you. Avg sentiment: 0.60. Avg recommendation rank: 1.0.

AI PROVIDER ANALYSIS

The table below shows what each major AI platform said about villabethney when asked to recommend businesses in this category.

PROVIDER	MENTIONED	SENTIMENT	POSITION	SUMMARY
ChatGPT	Yes	Positive	#1	Villas by Bethany is a luxury villa rental service specializing in St. Barthélemy, offering a curated collection of private villas in breathtaking locations. Founded by Bethany Ludwick, who has over four decades of experience in St. Barth's villa rentals, the company emphasizes...
Claude	No	Neutral	Not ranked	I don't have specific information about villabethney in my training data, so I can't speak to their reputation or customer reviews with confidence. Based on the domain name, this appears to be a villa rental or hospitality business, likely offering vacation accommodations. To...
Gemini	No	Positive	Not ranked	Villa Bethney appears to be a vacation rental property located in Sosúa, Dominican Republic, offering a luxurious experience with 4 king bedrooms. It's marketed as an "Exceptional" property, suggesting a high standard of accommodation and service. The website highlights various...

RECOMMENDATIONS

The following recommendations are prioritized by estimated impact on your AI Visibility Score.

HIGH PRIORITY

Add JSON-LD structured data

+15 points

STRUCTURED DATA

Your site has no JSON-LD schema. Add an Organization or LocalBusiness schema with name, address, phone, hours, and URL. This is the single biggest factor for how AI models understand your business.

ORGANIZATION.HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "Organization",
  "name": "villabethney",
  "url": "https://villabethney.com",
  "logo": "https://villabethney.com/logo.png",
  "description": "villabethney",
  "telephone": "+1-555-555-5555",
  "address": {
    "@type": "PostalAddress",
    "streetAddress": "123 Main St",
    "addressLocality": "City",
    "addressRegion": "State",
    "postalCode": "12345",
    "addressCountry": "US"
  },
  "sameAs": [
    "https://twitter.com/yourhandle",
    "https://www.linkedin.com/company/yourbusiness"
  ]
}
</script>
```

Claude doesn't mention you specifically

+5 points

AI AWARENESS

When asked about this business, Claude gave a generic answer. Build out structured data, get listed in directories that this model trusts, and publish authoritative content about the offering.

Gemini doesn't mention you specifically

+5 points

AI AWARENESS

When asked about this business, Gemini gave a generic answer. Build out structured data, get listed in directories that this model trusts, and publish authoritative content about the offering.

MEDIUM PRIORITY

Add an FAQ schema with common questions

+6 points

STRUCTURED DATA

FAQ schemas are heavily mined by AI chatbots. Pick the 5–10 questions customers actually ask and answer them on your site with FAQPage markup.

FAQ-SCHEMA.HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "FAQPage",
  "mainEntity": [
    {
      "@type": "Question",
      "name": "Do you offer a free trial?",
      "acceptedAnswer": {
        "@type": "Answer",
        "text": "Yes, we offer a 14-day free trial with no credit card required."
      }
    }
  ]
}
```

Write a meta description

+4 points

CONTENT CLARITY

Add a 140–160 character meta description that clearly explains what your business does. AI models often quote it directly.

META-DESCRIPTION.HTML

```
<meta name="description" content="Acme Coffee Roasters: small-batch specialty coffee roasted weekly in Brooklyn. Free shipping on orders over $30.">
```

Publish an llms.txt file

+7 points

AI-NATIVE

llms.txt is an emerging standard (like robots.txt for AI). Add /llms.txt at your root listing your most important pages with brief descriptions. Respected by OpenAI (GPTBot), Anthropic (ClaudeBot), and Perplexity crawlers — not used by Google AI, but still increases your overall AI crawler reach.

LLMS.TXT

```
# villabethney

> villabethney

## Core pages
- [About](https://villabethney.com/about): Who we are and what we believe.
- [Pricing](https://villabethney.com/pricing): Plan options and what's included.
- [FAQ](https://villabethney.com/faq): Answers to common customer questions.

## Documentation
- [API docs](https://villabethney.com/docs): Developer reference.
```

Add OpenGraph and Twitter Card metadata

+6 points

AI-NATIVE

Your page is missing OpenGraph and Twitter Card tags. Perplexity, Gemini, and Bing use og:description as their summary of a business, and Grok reads Twitter Card metadata directly. A few meta tags control how AI systems describe you.

```
<meta property="og:title" content="villabethney" />
<meta property="og:description" content="villabethney" />
<meta property="og:image" content="https://villabethney.com/og-image.png" />
<meta property="og:type" content="website" />
<meta property="og:url" content="https://villabethney.com" />
<meta name="twitter:card" content="summary_large_image" />
<meta name="twitter:title" content="villabethney" />
<meta name="twitter:description" content="villabethney" />
```

LOW PRIORITY

Add alt text to 1 image

+2 points

CONTENT CLARITY

1 of your images are missing alt text. Descriptive alt text (e.g. "team working in our Harare office") improves both accessibility and AI understanding of your page.

Replace div/span buttons with native <button> elements

+2 points

AGENTIC COMPATIBILITY

Some interactive elements use <div> or instead of <button>. AI agents navigate via the accessibility tree — non-semantic elements are invisible to them unless they carry exact ARIA roles. Native <button> tags also improve keyboard navigation and screen reader support with zero extra code.

SAFE AI INTEGRATION FOR YOUR BUSINESS

AI is reshaping how customers discover and choose businesses. Glance helps African enterprises integrate AI safely into their workflows, improving team productivity, customer acquisition, and revenue without the compliance and reputational risks of moving too fast.

Our engagements cover AI Visibility Audits, Agentic Workflow Design, and Custom AI Integrations tailored to your industry. Every engagement starts with your AI Visibility Score as the baseline and ends with measurable improvement.
