

AI VISIBILITY REPORT

WEBDEV

<https://webdev.co.zw>

D

AI Visibility Grade

Scored 15 July 2026 | Report ID: ac9f-718c | (Beta)

EXECUTIVE SUMMARY

Webdev achieved an AI Visibility Score of 44/100, earning a Grade D (Needs work) rating. This score reflects how prominently the business appears in responses from major AI platforms when customers search for products or services in this category.

1 of 2 AI providers mentioned Webdev in their recommendations.

The score is calculated across two pillars: Controllable Signals (60%) covering structured data, website quality, content, and online presence; and AI Awareness (40%) covering whether AI models mention, recommend, and rank the business positively.

Report generated: 15 July 2026 | <https://webdev.co.zw>

SCORE BREAKDOWN

The following table shows each scoring pillar, its contribution weight, the score achieved, and the key signals that drove that score.

PILLAR	SCORE	WEIGHT	DETAILS
Structured data	0/100	35%	No JSON-LD found on this page.
Crawlability	50/100	20%	AI crawlers allowed; no sitemap
Content clarity	68/100	20%	Title: yes · Meta: yes · H1s: 5 · Heading levels: 2
AI-native signals	25/100	25%	llms.txt: no · OG: no · Twitter: no · HTTPS: yes
AI awareness	64/100	40%	1/2 models mentioned you. Avg sentiment: 0.40. Avg recommendation rank: 1.0.

AI PROVIDER ANALYSIS

The table below shows what each major AI platform said about Webdev when asked to recommend businesses in this category.

PROVIDER	MENTIONED	SENTIMENT	POSITION	SUMMARY
Claude	No	Neutral	Not ranked	# About Webdev I don't have specific information about Webdev (.co.zw) in my training data, so I can't speak to their particular reputation, client reviews, or track record. However, based on the domain name and context, this appears to be a web development agency operating in...
Gemini	Yes	Positive	#1	Webdev (Pvt) Ltd is a prominent Zimbabwean company specializing in web hosting, online marketing, e-commerce, online payments, and web development solutions. They offer a comprehensive suite of services including various web hosting options (SME, VPS, managed), website design...

RECOMMENDATIONS

The following recommendations are prioritized by estimated impact on your AI Visibility Score.

HIGH PRIORITY

Add JSON-LD structured data

+15 points

STRUCTURED DATA

Your site has no JSON-LD schema. Add an Organization or LocalBusiness schema with name, address, phone, hours, and URL. This is the single biggest factor for how AI models understand your business.

```
ORGANIZATION.HTML
<script type="application/ld+json">
{
"@context": "https://schema.org",
"@type": "Organization",
"name": "Webdev",
"url": "https://webdev.co.zw",
"logo": "https://webdev.co.zw/logo.png",
"description": "Webdev",
"telephone": "+1-555-555-5555",
"address": {
"@type": "PostalAddress",
"streetAddress": "123 Main St",
"addressLocality": "City",
"addressRegion": "State",
"postalCode": "12345",
"addressCountry": "US"
},
"sameAs": [
"https://twitter.com/yourhandle",
"https://www.linkedin.com/company/yourbusiness"
]
}
</script>
```

Claude doesn't mention you specifically

+5 points

AI AWARENESS

When asked about this business, Claude gave a generic answer. Build out structured data, get listed in directories that this model trusts, and publish authoritative content about the offering.

MEDIUM PRIORITY

Add an FAQ schema with common questions

+6 points

STRUCTURED DATA

FAQ schemas are heavily mined by AI chatbots. Pick the 5–10 questions customers actually ask and answer them on your site with FAQPage markup.

FAQ-SCHEMA.HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "FAQPage",
  "mainEntity": [
    {
      "@type": "Question",
      "name": "Do you offer a free trial?",
      "acceptedAnswer": {
        "@type": "Answer",
        "text": "Yes, we offer a 14-day free trial with no credit card required."
      }
    }
  ]
}
```

Publish a sitemap.xml

+5 points

CRAWLABILITY

A sitemap helps crawlers (including AI bots) find every important page. Generate one and link it from robots.txt.

Publish an llms.txt file

+7 points

AI-NATIVE

llms.txt is an emerging standard (like robots.txt for AI). Add /llms.txt at your root listing your most important pages with brief descriptions. Respected by OpenAI (GPTBot), Anthropic (ClaudeBot), and Perplexity crawlers — not used by Google AI, but still increases your overall AI crawler reach.

LLMS.TXT

```
# Webdev

> Webdev

## Core pages
- [About](https://webdev.co.zw/about): Who we are and what we believe.
- [Pricing](https://webdev.co.zw/pricing): Plan options and what's included.
- [FAQ](https://webdev.co.zw/faq): Answers to common customer questions.

## Documentation
- [API docs](https://webdev.co.zw/docs): Developer reference.
```

Add OpenGraph and Twitter Card metadata

+6 points

AI-NATIVE

Your page is missing OpenGraph and Twitter Card tags. Perplexity, Gemini, and Bing use og:description as their summary of a business, and Grok reads Twitter Card metadata directly. A few meta tags control how AI systems describe you.

```
<meta property="og:title" content="Webdev" />
<meta property="og:description" content="Webdev" />
<meta property="og:image" content="https://webdev.co.zw/og-image.png" />
<meta property="og:type" content="website" />
<meta property="og:url" content="https://webdev.co.zw" />
<meta name="twitter:card" content="summary_large_image" />
<meta name="twitter:title" content="Webdev" />
<meta name="twitter:description" content="Webdev" />
```

LOW PRIORITY

Add a canonical URL tag

+2 points

CRAWLABILITY

Your page has no <link rel="canonical">. Without it, AI crawlers can index duplicate versions of the same page (www vs non-www, tracking parameters) and split your authority between them.

```
<link rel="canonical" href="https://webdev.co.zw" />
```

Use a single <h1> per page

+2 points

CONTENT CLARITY

Your page has 5 <h1> tags. Use one h1 and demote the rest to h2/h3 so the page hierarchy is unambiguous.

Add alt text to 14 images

+2 points

CONTENT CLARITY

14 of your images are missing alt text. Descriptive alt text (e.g. "team working in our Harare office") improves both accessibility and AI understanding of your page.

SAFE AI INTEGRATION FOR YOUR BUSINESS

AI is reshaping how customers discover and choose businesses. Glance helps African enterprises integrate AI safely into their workflows, improving team productivity, customer acquisition, and revenue without the compliance and reputational risks of moving too fast.

Our engagements cover AI Visibility Audits, Agentic Workflow Design, and Custom AI Integrations tailored to your industry. Every engagement starts with your AI Visibility Score as the baseline and ends with measurable improvement.
